

Creating a QR Code

Add QR codes to your VIPink campaign promotion, so supporters can scan the code you create! QR codes are easy to use, reduce printing costs, and help maximize your fundraising efforts.

Some ideas to add a QR Code to:

- Posters
- Invitations
- Email
- Social media

How to create a QR code:

1. Open the SGK Fundraise mobile app. If you don't already have it, you can [download the SGK Mobile app here](#). Your username and password are the same as those provided to you for your fundraising center.
2. On the home screen of the mobile app, click the pink "Share your QR Code" link.
3. Your QR code will appear!

Congrats! Now it's even easier for everyone to make donations on your fundraising page.

If you need any support with your fundraising center or the mobile app please don't hesitate to reach out to your staff liaison for support.
